Negative Correlations (vmax=0)

Page 4 - Quantitative EDA Findings & Summary

1. Missing Data: deck has 77.1% missing values (688/891), age has 19.9% (177/891), and embarked has 0.2% (2/891).
2. Gender Disparity: 74.2% of female passengers survived compared to only 18.9% of male passengers.
3. Socioeconomic Impact: Survival rate dropped by class -- 1st Class: 63.0%, 2nd Class: 47.3%, 3rd Class: 24.2%.
4. Cross-Demographic Insight: 3rd-class females (50.0% survival) survived at higher rates than 1st-class males (36.9%).
5. Correlation Dynamics: Class correlates negatively with survival (-0.34), while Fare correlates positively (+0.26).

Family variables SibSp and Parch show moderate positive correlation (+0.41) with each other.
